# PROBLEM STATEMENT

**The Challenge – A Travel Planner Agent is an AI-powered assistant that helps users plan trips efficiently and intelligently. It uses real-time data to suggest destinations, build itineraries, and recommend transport and accommodation options.**

**By understanding user preferences, budgets, and constraints, it tailors personalized travel plans.**

**Integrated with maps, weather updates, and local guides, it ensures a smooth travel experience.**

**The agent can also manage bookings, alert users to changes, and optimize schedules on the go.**

**This smart assistant transforms complex travel planning into a seamless, enjoyable process.**

---

# TECHNOLOGY USED

IBM cloud lite services

Natural Language Processing (NLP)

Retrieval Augmented Generation (RAG)

# IBM CLOUD SERVICES USED

- IBM Cloud Watsonx AI Studio
- IBM Cloud Watsonx AI runtime
- IBM Cloud Agent Lab
- IBM Cloud Storage
- IBM Cloud Deployment

# WOW FACTORS

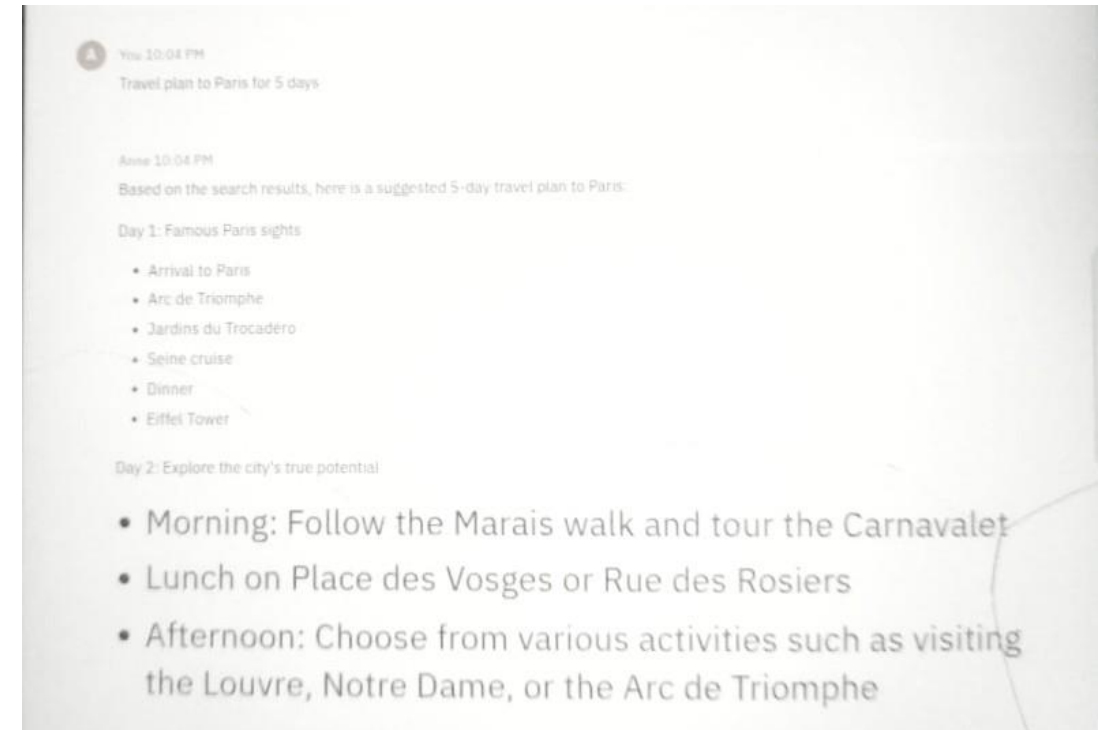

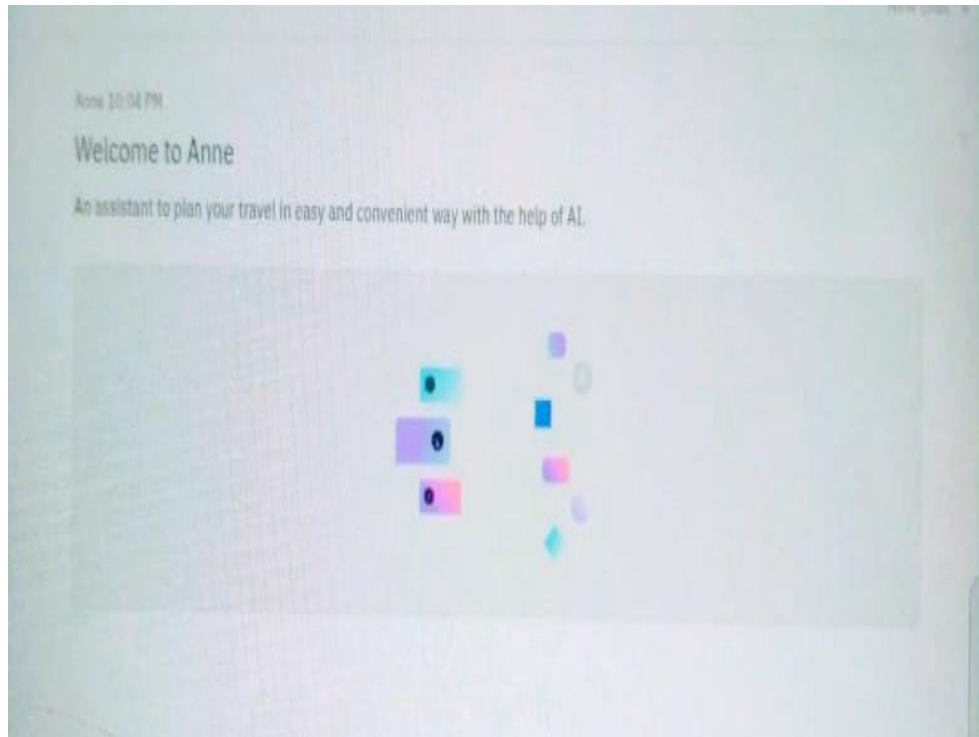

- The design is very interactive for the users to use and plan their travel ideas to reality with the help of AI
- The agent is capable of giving travel planner and corresponding activities for given number of days as per the requirements of the user.
- The interface is user friendly so that user can easily search for the data and further make changes if required.
- Searches for the information in different platforms and then provide relevant plans for the travel.

---

## END USERS

- Solo travelers
- Occasional traveler
- Family travel planning
- For friends out

# RESULTS

# RESULTS

- Morning: Follow the Marais walk and tour the Carnavalet
- Lunch on Place des Vosges or Rue des Rosiers
- Afternoon: Choose from various activities such as visiting the Louvre, Notre Dame, or the Arc de Triomphe

Day 3: Discover hidden gems and authentic addresses

- Morning: Visit the Sacre Coeur and explore the Montmartre neighborhood
- Lunch at a local bistro
- Afternoon: Browse through bookshops and visit the Luxembourg Gardens

Day 4: Enjoy gourmet restaurants and small, authentic addresses

Day 4: Enjoy gourmet restaurants and small, authentic addresses

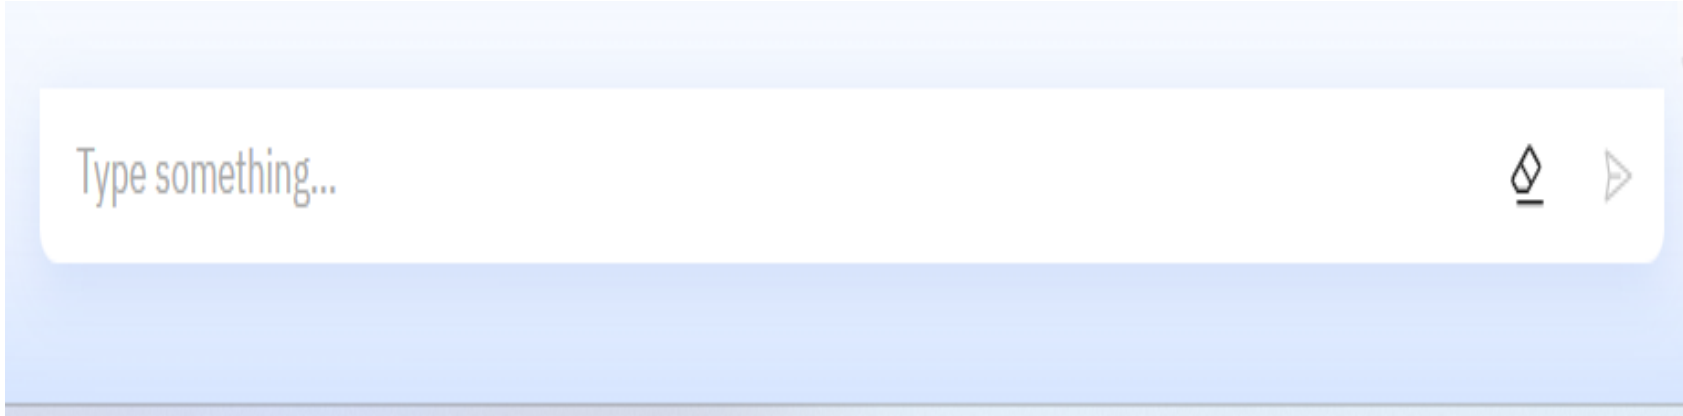

- Morning: Visit the Palais-Royal and explore the Tuileries Garden
- Lunch at a Michelin-starred restaurant
- Afternoon: Visit the Musée d'Orsay and explore the Saint-Germain-des-Prés neighborhood

Day 5: Relax and unwind

- Morning: Take a leisurely stroll along the Seine River
- Lunch at a charming café
- Afternoon: Visit the Champs-Élysées and explore the Galeries Lafayette

This itinerary provides a mix of famous Parisian landmarks, hidden gems, and authentic addresses, and can be adjusted to suit your interests and preferences.

## Deployed AI Agent

The screenshot shows the IBM Watsonx Deployment spaces interface. The breadcrumb navigation indicates the path: Deployment spaces / Travel12 / Anne. A search bar is present above the table. A blue button labeled 'New deployment' is in the top right corner. The table lists two deployments of the 'Anne' agent, both with a status of 'Deployed' and a tag of 'wx-agent'. The 'Last modified' column shows the deployment was updated 3 hours ago by 'Anjali K S (You)'.

Name	Type	Status	Tags	Last modified
wx-agent Anne	Online	Deployed	wx-agent	3 hours ago Anjali K S (You)
wx-agent Anne	Online	Deployed	wx-agent	3 hours ago Anjali K S (You)

---

## CONCLUSION

- The agent can generate a plan for the travelling based on the requirements of the user.
- It predicts the plan based on the destination, time of travel and other factors that the user needs.
- The user can further customize the response on telling what to do like number of days of travel, places to add or remove, time changes, etc.
- This helps users to make plan as they need and do not make anyone follow a schedule that is provided and is flexible to change to new changes.

# FUTURE SCOPE

- Personalized Travel Planning
- AI-Powered Customer Support
- Real-Time Booking System
- Data-Driven Marketing
- Secure Data Handling
- Mobile-First Travel Apps

# IBM CERTIFICATIONS

**IBM SkillsBuild**

Completion Certificate

This certificate is presented to

**Anjali.K.S**

for the completion of

**Lab: Retrieval Augmented  
Generation with  
LangChain**

(ALM-COURSE\_3824998)

According to the Adobe Learning Manager system of record

**Completion date:** 25 Jul 2025 (GMT)

**Learning hours:** 20 mins
